

5 function test strips

Test strips for quick and easy water analysis

Application

For measuring the pH value, chlorine/bromine, active oxygen, total alkalinity (TA) and calcium hardness.

Advantages

- Measures 5 parameters with only one strip
- Easy application
- No handling of reagents or test tablets necessary
- Results can be obtained quickly

Product description

Test strips with 5 measuring pads

Dosing recommendations

1. Dip entire test strip into the water, swish back and forth for 5 seconds and then remove it. Do not shake off water and immediately compare pH and active oxygen tests to colour chart.
2. Please wait another 10 seconds and then compare chlorine/bromine test, calcium hardness and total alkalinity tests to colour chart.

Important information

This product should be used solely for the purpose specified.

Protect test strips from sunlight and moisture. Store box in a cool and dry place with a temperature of no more than 30 °C. Close box immediately after taking out the test strips.

Do not touch the colour charts. When stored correctly the test strips will last until the printed expiry date.
